Scheduler	Flight Circle

Who are we (I-ACT):

The Infinity Aero Club Tampa Bay (I-ACT) is a IRS tax exempt 501 (c)(3) not for profit flying club. The founder and president is Ricardo Foster, USN, LCDR (Ret.). The flying club main goals are to broaden the appeal of aviation careers by encouraging diversity to the main stream public, with an emphasis on the youth within and surrounding the state of Florida. In this vein, we are working to partner with middle and high schools to encourage Aviation STEM (AvSTEM) programs within the local Tampa Bay area.

I-ACT AvSTEM program will be designed to actively engage with the youths (8-22 years old) to expose and involved them in remote drone flight training, pilot flight training, kit-aircraft construction techniques, to include aircraft avionics installation and maintenance. Each one of our AvSTEM program will be designed to encourage the youth towards attaining their aviation maintenance, private pilot and part 107 remote pilot certification. Our community outreach programs expose area community schools to the plethora of aviation careers available through our AvSTEM outreach seen here at a middle school AvSTEM day: <https://www.gleimaviation.com/2020/10/02/inspiring-students-at-aviation-kids-usa-stem-day-event/>
